Section I

Welcome!

Thank you very much for buying this first edition of my home improvement how-to article compilation. Since 1988 it's been my privilege to help people like you make good things happen in their homes and workshops through my magazine articles, newspaper stories and live seminars. This ebook contains a 200+ page sampling from the more than 3000 articles I've written over the last 20 years. It includes as much information as I could cram into one Acrobat document, while still keeping file size reasonable.

I could have published this book on paper, but digital publication in PDF format offers real advantages. Production is less costly, distribution's easier, you can search for specific words and topics, and I can constantly update the content for subsequent editions as I write new articles.

To search for a specific topic, simply type a key word or phrase into the search field of the Acrobat program. That simple step automatically generates a list that includes every instance of the word you're looking for. Click on the one you like and it'll take you there.

My livelihood depends on helping you with the home improvement and woodworking issues that matter in your life. That's why I welcome your input and suggestions. Please email me any time at steve@stevemaxwell.ca. Although the volume of messages I receive sometimes prevents individual response, rest assured that each email does get read.

Thanks again for purchasing my publication,

Steve
